

# Bags of Fun Instructions

Project and template designed by Sara Sandberg

## Step 1

Cut out your templates and fold the score lines.

## Step 2

Fold the top down on what will be the inside of the bag. Don't stick!

## Step 3

Fold the sides as shown above.

## Step 4

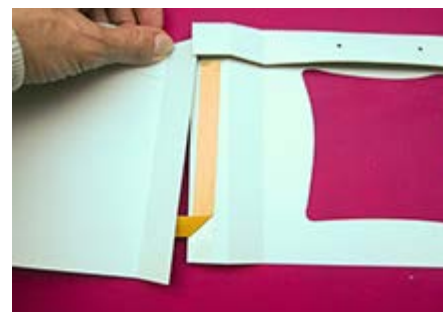

Add double sided tape to the side sections as shown.

## Step 5

Take the backing off the very bottom, folding it back on itself.

## Step 6

Tuck the back piece under the flap and into place. Do not stick.

## Step 7

Hold it in place while you tuck the other side under the flap and into place.

Now hold your hand flat on it to hold in place, and carefully pull the tabs of the double sided tape backing out to the side, which will pull the backing off and stick the pieces in place.

## Bags of Fun Instructions, continued

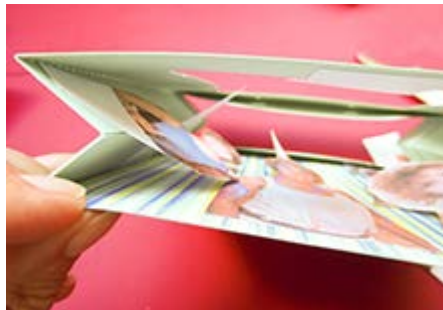

---

### Step 8

Your shopping bag is now made!

### Step 9

Use the sides to add pieces that will either direct towards the front or back as the bag is opened out, depending on which of the side panels you add it to.

### Step 10

Thread ribbon through the holes for handles. A [Kwik-Thread](#) makes this really quick and easy to do.
