

Easter Bunny Gift, Instructions

Project and template designed by Sara Sandberg

Step 1

Cut out your bunny templates and put them together as shown. The whole back piece of him is not symmetrical - make sure you put the fluffy tail on what will be the back!

Step 2

Cut out your box template. The rounded flaps are the top and not for sticking! Fold the box up and stick the bottom tab. Then fold the front up and stick with the tabs. Keep the lid open.

Step 3

Fill the box with eggs of your choice and no pinching any!!!

Step 4

You can tie a ribbon and bow round the box if you like - keep the bow towards the front of the box so that it doesn't get in bunny's face. Here's a tutorial on [how to tie a bow!](#)

Step 5

Glue the face on to the front of the bunny back piece.

Step 6

Stick it to the back of the present (so that the opening is at the front). Make sure the bottom of the box and bunny are aligned so that it sits flat on the surface.

Step 7

Stick Bunny's feet on to the box, making sure they are aligned with the bottom. Stick his hands on, letting them come up over the sides a little bit.
