

Elephant Shaped Card

Project and template designed by Sara Sandberg

There are three elephant shapes to cut out with the templates.

The elephant with the fold line is the back, the solid elephant the middle, and the elephant with the ear and eye is the front piece.

This card was designed for my lovely Mum's birthday.

Step 1

Cut out your templates, and ink the edges of your front elephant piece.

Step 2

Glue the front elephant to the elephant without the fold line - do not put glue on the ear!

Step 3

Glue the back elephant to the rest putting glue above the score line and on the trunk.

Step 4

You can put a dimensional pad behind the ear to raise it slightly.

Step 5

Fold the bottom of the back elephant at the score line.

Step 6

Fold it back as shown to write in it, or you can write on the back of the elephant..
