

Owl Shaped Card (Style 2)

Project and template designed by Sara Sandberg.

This card really is as easy as just cutting out the pieces and sticking them on!

Put the tummy piece and decoration on before the beak and claws, as they overlap it.

The owl base with the dotted line is the back piece. Fold it along the dotted line, and put your adhesive above the folded line to attach it to the front.

When you want to write in your card, open it flat before putting it on your work surface to write in.
